Meat, dried meat, meat substitute pieces (bacon bits, pepperoni, etc.), or melted cheese toppings are not allowed in food exhibits. They may result in an unsafe food product by the time the item is judged due to unpredictable heat/and or weather conditions and will be disqualified.

One item of each food exhibit (except the food preservation exhibits and the cake decorating exhibits) will be left on a plate with ribbon placing and information attached. The balance of the food exhibit will be put on a Bake Sale Table. The items will not be priced but a donation will be asked with the proceeds to go to the 4-H Council.

DIVISION 407 - FOOD PRESERVATION

GENERAL INFORMATION:

1. PROCESSING METHODS - Current USDA processing methods and altitude adjustments must be followed for all food preservation.

Jam, preserves and marmalades, fruit, tomatoes and pickled products must be processed in a boiling water bath. (Tomatoes may be processed in a pressure canner.) All non-acid vegetables and meats must be processed in a pressure canner. Paraffin should not be used to seal canned goods. Open kettle canning (putting hot food in a jar, putting a lid on in and giving it no further processing) is not acceptable for any "canned" product.

Soup mixes and other foods with thickeners (like flour or starch), cream or milk, pasta/noodles, or rice are not permitted.

Spoiled or unsealed container disqualifies entry.

2. UNIFORMITY - Jars and type of lid should be the same size, all small or all large, not necessarily the same brand. Half pint jars may be used for jellies and preserves. The jars are not to be decorated in any way. Canning jars must be used - others will be disqualified. No one fourth pint jars allowed.

Leave jar rings on for fair display, it helps protect the seal. **No zinc lids.** Improperly canned or potentially hazardous food items will be disqualified.

3. CURRENT PROJECT - All canning must be the result of this year's 4-H project, since September 1, of the previous calendar year.

4. CRITERIA FOR JUDGING - Exhibits will be judged according to score sheets available at the Extension Office or at <http://4h.unl.edu/nebraska-state-fair>. Incomplete exhibits will be lowered a ribbon class. Canned food items not processed according to altitude in the county will be lowered one class ribbon. Check with the Extension Office for our county's altitude and how that affects food processing times and pounds of pressure.

5. DISPLAY - Enter food projects in disposable materials, i.e., paper plate or plastic self-sealing bag. The Fair Board is not responsible for lost bread boards, china or glassware.

6. RECIPE /LABELING - Recipe must be included, may be handwritten, photocopied or typed. Commercially prepared mixes are not allowed. See

<http://food.unl.edu/web/preservation/home> for current USDA guidelines, how to find your Nebraska altitude, and proper procedures for food preservation. Jars should be labeled with name of 4-H'er, county, name of product and date of processing. Write plainly on a label and paste or tape securely on jar bottom. In addition:

All canned foods must include the following supporting information on the label of the item:

1. Method of preservation (pressure canner or water bath canner)
2. Type of pack (raw pack or hot pack)
3. Altitude (and altitude adjustment if needed)
4. Processing time
5. Number of pounds of pressure (if pressure canner used)
6. Recipe and source of recipe (If a publication, include name and date) **RECIPE CAN COME FROM ANY SOURCE BUT CURRENT USDA GUIDELINES FOR FOOD PRESERVATION METHODS MUST BE FOLLOWED.** See <http://food.unl.edu/web/preservation/home> for current USDA guidelines.

All dried foods must include the following supporting information:

1. Recipe and recipe source
2. Method of pretreatment
3. Drying method and drying time.

Write plainly on label and attach securely to exhibit. Securely attach official entry card to exhibit. Multiple dried food exhibits should be secured by rubber band or "twisty" to keep exhibit containing the 3 self-sealing bags together.

A prepared Food Preservation fill-in card (4 per page) is available at:

<https://unl.box.com/s/qr0c8fv8vgrdwk1g4ea7d72hv9lzhmhk>. **Download** the form and then you can type into this form on your computer and then print it.

Information on Fruit Spreads

What is the difference between jam and jelly? Marmalade and preserves? All of these fruit spreads have four basic ingredients: fruit, sugar, acid and pectin. The method of preparing and cooking the ingredients is what makes the difference.

Jelly uses strained juice from fresh fruit. The end product has a clear, shimmering appearance. It holds its shape when removed from the jar yet spreads easily.

Jam requires crushed or chopped fruit. Jam is cooked until it rounds up in a spoon. Jam should be slightly firm. It will not retain its shape. Jam is less firm than jelly. Thickness results from cooking the excess liquid out. Prepare jam in small batches and cook rapidly.

Preserves contain whole fruit or large pieces of fruit suspended in thick syrup. The fruit retains its shape. Use a pan with a wide opening and work in small batches.

Marmalades are jellies with pieces of fruit, pulp and peel suspended throughout. When preparing the fruit, leave some of the white pith that is next to the peel. The white pith is high in pectin, which makes the jelly "jel". Marmalades are cooked rapidly until close to the jelling point.

Conserves are jam-like mixtures of two fruits. Prepare them in small batches and cook rapidly after the sugar has dissolved.

Fruit batters are smooth, thick spreads created by cooking fruit pulp and sugar slowly to the desired consistency. Spices are often added to complement fruit flavors.

Regardless of the type of fruit spread you prepare, use a test recipe and do not adjust the proportions of ingredients. You may end up with a unique product. And remember, according to the USDA, fruit spreads must be processed in a boiling water bath. The use of paraffin is NOT recommended.
